

## UF CHOOSES RON'S WINDOW COVERINGS FOR PRESIDENT'S RESIDENCE PROJECT

**R**on's Window Coverings is the oldest continuing window treatments business in the Gainesville, Florida area. It's no wonder this respected Showcase Priority® Dealer was chosen by the University of Florida to provide all window coverings for Dasburg House, a 7,400 square foot residence for its new president.

Founded in 1977 by Ron Molyneux, the company remains a family enterprise, now managed by Ron's son, Cory, who grew up working along side his father since a little boy, and assumed ownership in 2004. Cory's wife, Megan, also plays an integral role, running the commercial side of the business.

"Our company has had a 30-year relationship with the University of Florida," said Megan. "And Cory is known as the 'motor guy' who is good at handling large projects with unique applications, so that's why we were chosen."

Since Dasburg House was new construction, the goal was to have a modern and sophisticated look with the

newest technology. Megan recommended Silhouette® window shadings in the Quartette™ 4" vane size, Originale™ fabric, and White Diamond color.

"We installed 44 Silhouette shadings," Megan commented. "14 of them were hard-wired motorized and integrated into the home's automation system and all of the others used the UltraGlide® 2 Click and Walk Away™ system. The more challenging windows are located up high, including transoms that surround the entire front entrance."

Although located in Gainesville, Cory and Megan serve clients throughout Florida, due in part to their business model. They established a sister company to Ron's Window Coverings called Florida Contract Automated Shading (FCAS) that specializes in fabricating, motorizing and installing window coverings in upscale and commercial settings.

Megan explained, "FCAS, a Women-Owned Small Business, came to conception so we would have our foot in the commercial industry. We

have closely teamed up with Hunter Douglas Contract, getting Hunter Douglas RB500 Motorized Roller shades out in the commercial world, as well as beta testing the newest products. We enjoy complicated projects that are "out of the box" and require the highest of engineering."

With Cory and Megan at the helm, Ron's Window Coverings (and FCAS) are destined to thrive another 30+ years.
